| The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply | | | | | | |
| A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). | | | | | | |

Response to Amendment

1. The amendment filed on 1/17/06 has been entered. New claims 4-20 are added and claims 1-20 are now pending.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Varga et al (US 6,181,981 B1).

As per claims 1-20, Varga discloses a method for transferring information between multiple buyers and vendors that includes receiving information corresponding to one or more products from one or more of the vendors (fig. 1), the information characterizing the one or more products as being of a static nature, storing the information, receiving a request for a portion of the stored information (fig. 1, 10), retrieving the portion of the stored information corresponding to the request; using the retrieved portion of the stored information to maintain a dynamic record of product availability parameters (fig. 1, 60). Varga further discloses selective access to the dynamic record of product parameters of the one or more products and triggering a specific action related to the dynamic record of product parameters (col. 2, lines 41-54), access is provided between the subscriber (100) and the sources (40). With regard to claims 4-9, the first database includes product information and access to information/databases is only granted to

certain entities (fig. 1, 301), a system wherein the static information includes product information (fig. 1, 40), wherein the access to the stored information is granted to one or more of the buyers and vendors (fig. 1, user), providing buyers information related to one or more of inventory, product mix, and stocking levels based on a continuous record or product usage and disposition, providing buyers with a reordering tool, and providing vendors information related to one or more of product sales, product mix, manufacturing cycles, selling methods and supply (col. 2, lines 41-46), a system including the setting of one or more predetermined thresholds for each of the buyers (threshold is determined when products reach a certain level for re-supplying).

Varga does not disclose pre-authorized permissions but it would have been obvious to one of ordinary skill in the art at the time the invention was made to include pre-authorized permissions into the system of Varga because it would prevent vendors to access information that they should not have access to and also improve the efficiency of the inventory by monitoring the product parameters to determine when to restocking some of the products.

Response to Arguments

4. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Application/Control Number: 10/810,353

Art Unit: 3627

• Alling (US 2003/0023503 A1) discloses a method and system for providing vendor-

managed inventory service via a vendor-managed inventory tool over a network

Page 4

environment and comprises receiving a signal from a sensor device indicating that a

minimum level specified for a product used in a manufacturing location has been

reached.

6. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Ronald Laneau whose telephone number is (571) 272-6784. The

examiner can normally be reached on Mon-Fri from 8:30am - 6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Alexander Kalinowski can be reached on (571) 272-6771. The fax phone number for

the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
